

### **New book: Receive social security benefits or go to work?**

Many believe that Norway has too generous social security benefits and that the welfare system must be stricter. But is the situation really out of control? Sickness and disability cost Norwegian society much in lost earnings and direct expenses. However, there are many myths and dubious claims in the debate on employment and social security. In his newest book, *Social security or work? A socio-medical perspective on sickness and disability*, Professor Emeritus [John Gunnar Mæland](#) focus on what we actually know about work absence due to health reasons. [Read more here \(in Norwegian\).](#)

### **Education: More health for the money – course in health economics**

A newly established course in health economics will give masters and doctoral students the opportunity of providing more effective health care. For the first time Centre for International Health this year could invite students to the course *Applied Economic Evaluation in Healthcare*. CIH is one of the few academic environments in Europe to offer such a training course. - The course examines different techniques for measuring cost effectiveness. In health care, resources are always scarce, and the aim is to get the most health for the available money, says course coordinator and Professor at CIH, [Bjarne Robberstad](#).

### **Government Commission: Open and just - priorities in the Norwegian healthcare services**

On November 12th, the Norwegian Commission on Priority Setting in Health Care handed over their report to the Norwegian Minister of Health and Care Services, Bent Høie. The Commission has been led by Professor [Ole F. Norheim](#). The Commission decided to recommend three new criteria for priority setting, namely: Health gain, use of resources and health loss. These criteria must always be considered in conjunction with each other. The commission also recommends four principles for the best possible priorities. [Read more about the recommendations here \(in Norwegian\).](#)

### **Cecilie Svanes receives LHL research award**

Thursday 20th of November Professor [Cecilie Svanes](#) was awarded the Chronic obstructive pulmonary disease (COPD) award for her longstanding effort in asthma, lung health and COPD research. The award is given annually by The Norwegian Heart and Lung Patient Organisation (LHL). Svanes is researching how the living conditions of grandparents and parents can affect the development of asthma and COPD among children. She has published about 100 articles in a number of international journals in the last 30 years, and is, according to LHL, among the most cited lung health researchers in Norway.

### **TVEPS in pioneering new research collaboration**

On November the 6th Centre for interprofessional work-place learning (TVEPS) [was rewarded with 200 000 kroner](#) by the Norwegian Research Council to do research in the field of interprofessional collaboration. The research is part of the collaboration between the Faculty of Medicine and Dentistry, Faculty of Psychology, Faculty of Humanities at the University of Bergen, Faculty of Health and Social Sciences at Bergen University College and the Municipal Council's Department for health and care. The unique collaboration has received attention in the media and a [radio interview about the research collaboration is available at NRK Hordaland here.](#)

## National budget winner: SEFAS

The Centre for elderly and nursing home medicine (SEFAS) is one of the winners in this year's government budget. 21<sup>st</sup> of November Centre leader [Bettina Husebø](#) was informed that SEFAS will receive 2 million Norwegian Kroner in project funding. – This is very good news for our research, Husebø says. The Centre was established to meet the need for replenishment of expertise, professional development and recruitment to solve future challenges in elderly care, both in retirement and nursing homes and in the municipal home care.
