

CCBIO seminar (BMED380)

Thursday, November 24, 14:30 at the BBB, Auditorium 4

Advances in fibroblast biology

Donald Gullberg

Department of Biomedicine and CCBIO, University of Bergen

In the past year a number of interesting publications relating to fibroblasts biology, of relevance to both fibrosis and cancer biology, have been published. In my lecture I will discuss these new findings and relate them to our own research on a major collagen-binding integrin present fibroblasts, alpha11beta1.
