

For those who do not know me, my name is Adrien and I am a postdoc in numerical analysis.

After the year and a half that I spent in Bergen, I want to take part in the decisions concerning the mathematics institute.

I participate in most of the social activities organised in the mathematics department, so that I know most of the temporary and permanent staff, as well as their concerns regarding the life and future of our mathematics institute. Please vote for me if you think I can be a good representative for you.

Best,  
Adrien Laurent
