

Francesco Ballerin

Hi! My name is Francesco Ballerin and I am a PhD student in the Analysis&PDE group.

I am originally from Italy, and I have been living in Bergen for the past 5 years. As an international employee I find particularly important to promote activities and offerings that have the aim of facilitating integration and collaboration within our department, especially for other international employees and students. In this regards I have been helping organizing kakecos for the past 2 years, offering a safe and informal place to practice the Norwegian Language together.

I would like to join instituttrådet in order to continue and improve on this effort.
