CISMAC-Guidelines for publications and payment of article processing charges (APCs)
Updated September 2018

CISMAC strongly favors Open Access Publishing and, to support you in pursuing a good publication choice, this note informs you of opportunities to have APCs waived or covered (in part) by the University of Bergen (UiB) or CISMAC.

Many journals levy rather substantial article processing charges (APCs). Here is how we will promote Open Access Publishing while minimizing APC payments.

Use opportunities for waivers
First of all, many journals reduce or even waive APC if the corresponding author is from an LMIC. Such waivers have been achieved by many CISMAC authors.

UiB support to open access publishing
If a waiver cannot be granted, the UiB covers the cost, or part of the cost, of a publication if:
1. one of the corresponding authors (most journals allow more than one!) is affiliated with UiB (employee, registered PhD student or registered Master student) and the application to the UiB is done by this author,
2. the journal is open access and registered in the Norwegian Register for Scientific Journals, Series and Publishers (most “quality” peer-reviewed journals are), and
3. the paper is accepted for publication, but is not yet published by the journal, i.e. the application to UiB needs to be done after acceptance but before publication.

Please note that the UiB publication fund fully covers APCs of “pure” Open Access journals. The journal must be registered in the Norwegian Register for Scientific Journals, Series and Publishers and in the Directory of Open Access Journals (DOAJ). It also refunds 50% of the APC for Open Access publication in subscription journals ("Hybrid Open Access") if it is a level 2 (the highest level) journal (Norwegian Register for Scientific Journals, Series and Publishers).

You’ll find further information here: publication-fund-open-access-UiB
And the link to the application form here: http://data.ub.uib.no/bpoa

When choosing the journal for your paper, i.e. before submission, we ask you to take the above considerations into account. When accepted, you should immediately apply to have the fee waived (if one of the corresponding authors is from an LMIC institution). If that is not possible, UiB affiliated corresponding authors can apply as described above to have UiB cover the APC.

Prior approval required for CISMAC to cover part of APCs
CISMAC acknowledges that there may be situations where a waiver cannot be obtained or the UiB criteria above for full coverage are not fulfilled, such as when there are no appropriate high impact open access journals or when the corresponding author(s) are not UiB-affiliated. In such situations, CISMAC will consider covering part or all of the APC. The amount of financial support will depend on multiple factors, such as the degree of agreement with CISMAC’s priorities, the quality of the work, and the level of the journal (as ranked in the Norwegian Register for Scientific Journals, Series and Publishers). If you want to have CISMAC support for the APC, you should discuss it with the Publication Committee (attn. Ane Straume) before submitting the paper.
It is a prerequisite for the support that CISMAC’s contribution is mentioned in the acknowledgement section of the publication as required by the Research Council of Norway. You can use one of the following texts:

a. This work was [funded / supported] by the Research Council of Norway through its Centres of Excellence scheme (project number 223269) and the University of Bergen (UiB), Norway to the Centre for Intervention Science in Maternal and Child Health (CISMAC).

b. The contribution by [name of the investigator] was supported by the Centre for Intervention Science in Maternal and Child Health (CISMAC), which is funded by the Research Council of Norway (project number 223269) and the University of Bergen (UiB), Norway.

c. [Name of the investigator] is affiliated to the Centre for Intervention Science in Maternal and Child Health (CISMAC), which is funded by the Research Council of Norway through its Centres of Excellence funding scheme (project number 223269), the University of Bergen (UiB), Norway.

If other funders or the journal require alternative wording, the above may be modified accordingly, maintaining the acronym CISMAC and the RCN project number 223269.

If you have any questions regarding publications and publication fees, please contact Ane Straume, ane.straume@uib.no CISMACs administrative leader, who also administers the work of the Publication Committee. During her leave until early 2019 you can contact her substitute Catherine Schwinger, c.schwinger@uib.no.
