

*IFT Valg/Election 2024*

## **Helge Henjum**

My name is Helge Henjum and I am a postdoc at IFT within the medical physics group! My main scientific focus is including biological effects in cancer treatment with proton therapy! Outside academia, I enjoy music and sports in every form.

I have been at IFT for 10 years now, and am familiar with the culture of this establishment. Therefore I know what IFT needs and will be a great candidate for sitting on the institute board.
