Academic publications

The department is currently getting an overview of the academic publications that all academic staff have registered in Cristin for 2014. Number of publications is an important research objective for K1. Latecomers are still allowed to register the very last entries.

Publications show academic activity. When research is one of our two main tasks, it is an obvious consequence that we as department, sections and individuals are measured on publication results. At K1 we look at the number, number in relation to academic positions in the base budget, first and last authorship, type of journal, citations and subjective quality. Co-authorship show active participation and cooperation, and author composition reflects where the main part of the research has taken place.

Publications are important to get impact for external funding. Building a CV is vital for key personnel, not least if you are to be a research project manager and main applicant.

The University of Bergen and our faculty are to some extent funded through achieved publication points. Address and author cuts are taken into account in the calculation of points, in addition to journal quality measured as level 1 or 2. A national committee has recently proposed a change in the model so that international cooperation is given added value, and that cooperation between institutions should not result in as much reduction in points as today. This would lead to more equal distribution of points between disciplines and Medicine will be better off than today.

Publication points are not well suited as objective for the single K1 employee, particularly when looking at one year isolated. The faculty has also decided that the departments’ financing should no longer be directly linked to the research and education outcome.

Nevertheless, the publication result for 2014 will be interesting reading. How many academic publications did we have at K1 in 2014, and how will each section appear? This is of interest all the while we know that the basis for the 2015- and 2016-results is made right now.

Nils Erik Gilhus
Head of Department
Get to know K1’s research groups:
The Bergen Research Group for UltraSound in GastroEnterology (BRUSE)

BRUSE has for over 35 years in close collaboration with Haukeland University Hospital developed new methods for clinical ultrasonography with the overall aim of improving diagnosis and management of patients with digestive diseases.

They work with methods in contrast-enhanced ultrasound, endosonography, Doppler, three-dimensional ultrasound, Strain Rate Imaging, sonoelastography, intervention, advanced visualization, and GI motility.

The group has special focus on 9 research areas:
- Three-dimensional ultrasonography
- Ultrasonographic function examinations
- Sonoelastography - Strain Imaging
- CEUS - Microbubbles
- Advanced visualization - the Illustrasound project
- Endosonography
- Sonoenterology / Hydrosonography
- Hepatological research in ultrasound
- Ultrasound-mediated therapy

Group leader is Odd Helge Gilja.

Read more at the group’s web pages.

Treating stroke with gas bubbles and ultrasound

This is a unique treatment that only Haukeland offers among the hospitals in Norway.

Tiny bubbles with gas is inserted into the blood. Then ultrasound is sent through the temple. When the ultrasound hits the bubbles in the head, the thrombosis is crushed more effectively than using only medication to dissolve it.

-We see that the thrombosis is more rapidly decomposed with this new method, says Christopher Kvistad from the research team who currently has a research project on the method. Kvistad recently defended for the PhD at K1 (see p. 10). He and colleague and K1 fellow Aliona Nacu receive all patients who arrive at the Neurological Department with stroke, to provide this treatment - whenever it should be. Read more in BT article.

Better visualization of protein analyses and new bioinformatics tools

Two ground-breaking articles in medical biotechnology have recently been published in the well acknowledged journals Nature Biotechnology and Proteomics.

The articles are from the KGJ Centre for Medical Research and National Competence Centre for MS. K1’s Eystein Oveland is one of the authors of both articles.

This work has contributed to the development of new bioinformatics tools for mass spectrometry based proteomics analyses as well as emphasized the importance of correct presentation of such data. Both elements will hopefully over time contribute to increase our knowledge about diagnostics and lead to earlier and more precise diagnoses.

Read more here.
### SPIRE-funding for 2015

UiB call on strategic funding for international collaboration in research and education, the Strategic Programme for International Research and Education (SPIRE).

You can apply for SPIRE-funding in two categories:
1. International network/partner collaboration
2. Guest researchers

The deadline is 23. April.

See [call], [guidelines] and [application form] (Norw.).

---

### The FORNY2020 programme: proof-of-concept funding for 2015 II

Extra call of proof-of-concept funding spring 2015. Deadline is April 15th.

Researchers in Bergen now have the opportunity to apply for several million in funding from the Research Council for projects with a commercial approach. Proof-of-concept funding is a golden opportunity to raise funds to carry out testing, upscale and continuation or further development of your research project - regardless of discipline. BTO takes responsibility for coordinating proposal writing, project management and business development.

Contact BTO as soon as possible for initial project discussions.

[Read more here](Norw.).

---

### Funding for human biobanks and health data

Call from the Research Council; NOK 45 million for research on human biobanks and health data (BIOBANK).

Deadline is 15. April.

The primary objectives are to generate research-based new knowledge aiming at prevention, detection, diagnosis, treatment and survival of somatic and psychiatric diseases, and to take advantage of the potential for research on human biological material in human biobanks, by coupling analysis results with data from health surveys, health registers and other relevant registers.

[Read more here](Norw.).

---

### Preannouncement: FRIPRO

The NRC reports that deadline for the FRIPRO-call will be May 27th.

FRIPRO supports broad-based, independent, basic research. Note also a new application category in FRIPRO this year: "Toppforsk" with more long-term and comprehensive support than usual researcher projects, but with shorter duration and significantly lower contribution from the Research Council than a CoE. The instrument is meant to provide research institutions with the opportunity to develop more internationally leading research.

The call is not yet published, so far just a pre-announcement.

[Read more here](Norw.).
Match-making seminar for new joint Call on industry-relevant research

BIO-NANO match-making seminar for new joint Call on industry-relevant research in autumn 2015 (NANO2021 and BIONÆR). Oslo, 21 April.

The Research Council will have a 20 mill. NOK call for industry-relevant research in autumn 2015, within the combination nano technology and bio based industries. NANO2021 and BIONÆR host an informational match-making seminar on the call. Bring your project ideas and establish a consortium for a potential proposal.

The Research Council's Focus on Business Seminar 2015 takes place in Oslo the same day, and can be combined with the match-making seminar. 

Read more here (Norw.).

Research prize: The Keio Medical Science Prize

The Research Council has passed on an invitation to nominate candidates for the Japanese Keio University's international prize for basic or clinical medicine. Deadline for nominations is 10. March.

The nominee must have made a breakthrough in the fields of medicine and life sciences, or a related field. He/she must have made an outstanding contribution to basic and clinical medicine. Nominees must be currently active in their field of research, and be expected to make future contributions to the field.

The prize is of 100 million yen (about 670.000 NOK). 

Read more here.

National Science Week 2015

National Science Week (Forskningsdagen) will this year be 16.-27. September. If your unit wish to participate at the Science Fair, register now!

Forskningsdagen is the annual National Science Week and UiB is the largest contributor to the events taking place in Bergen. This year's overall theme is "Food", but all academic fields are invited to participate and show their research to the general public.

Registration deadline for the Researcher's Grand Prix is May 15th.

All academic groups are invited to add more events to the festival period. Notify within 1st of May if you have an event that you would like included in the festival programme!

Read more here.

Current EEA/Norway grants

Current deadlines for relevant EEA funding; mobility and grants for collaboration with selected Eastern-European countries.

- **Norway-Romania** (scholarships and inter-institutional cooperation in higher education). Deadline: 30. March.
- **Norway-Poland scholarship** (mobility for students and staff, both directions). Deadline: 1. April.
Selected Horizon 2020 calls

Here you can find gathered the calls under the Horizon 2020-umbrella. Horizon 2020 is an EU-program with much to come for. Search through the portal and find the calls relevant for your field! See main page with calls here. UiB also has their own Horizon 2020 web page.

Selected current calls:

The programme Personalising Health and Care

**PHC-21-2015**: Advancing active and healthy ageing with ICT: Early risk detection and intervention

**PHC-25-2015**: Advanced ICT systems and services for integrated care

**PHC-28-2015**: Self management of health and disease and decision support systems based on predictive computer modelling used by the patient

**PHC-30-2015**: Digital representation of health data to improve disease diagnosis and treatment

Under Industrial Leadership: emne Nanotechnologies, advanced materials and production.

**NMP-11-2015**: Nanomedicine therapy for cancer

**NMP-12-2015**: Biomaterials for treatment and prevention of Alzheimer’s

**BIOTEC-2-2015**: New bioinformatics approaches in service of biotechnology.

Under Spreading excellence and widening participation:

**Twinning**: Partnering of an institution from low performing member state and at least two internationally-leading research institutions in other Member States. Deadline: 7. May.

Under Marie Sklodovska-Curie Actions (MSCA):

**Research and Innovation Staff Exchange (RISE)**: International and inter-sector collaboration. Deadline: 28. April. Also read the call at the NRC.

Other Horizon 2020-related calls

From the European Research Council:

**Consolidator Grant**: Excellent PIs consolidating their own independent, ground-breaking research. Deadline: 12. March. **Advanced Grant**: Excellent already established PIs. Deadline: 2. June.

**COST call**

Funding for networking activities with focus on European research issues, particularly younger researchers. All fields in research and technology. Deadline: 24 March. Read more here.

**ERA-NET TRANSCAN-2 call**

"Translational research on human tumour heterogeneity to overcome recurrence and resistance to therapy“. Pre-proposals deadline: 16. March. Read more here.

**JPND (Joint Progr. Neurodegen. Disease Research)**

European research projects on neurodegenerative diseases: "risk and protective factors, longitudinal cohort approaches and advanced experimental models"; 2-stage. Deadline: 10. March

**AAL (Ambient Assisted Living) Joint program**

Development of technology and solutions which might help elderly to live longer at home. Title: "Living active and independently at home". Deadline: 28. May. Read more here.

**IMI-utlysninger**, deadline 24. March

From Innovative Medicines Initiative. **Call 3**: Remote assessment, type 2 diabetes, neuropsychiatry, vaccine manufacture, pertussis vaccines, patient focused medicine development.
CCBIO Special Seminar: "Tumor plasticity and drug resistance"

CCBIO is proud to present a CCBIO Special Seminar April 8th with speakers Rik Thompson and John Haley.

Title: "Tumor plasticity and drug resistance"
Time and place: April 8th, 14-16.00, Aud.4 BBB
Speakers are:
- Rik Thompson, Queensland University of Technology, Brisbane Australia
- John D. Haley, Stony Brook School of Medicine New York, SBU Cancer Center and SBU Proteomics Center.

Apart from the interesting talks, the CCBIO seminars are a good way to meet CCBIO members and associates. Please feel free to circulate the invitation as all are welcome!
See abstracts here.

The NOKUT Conference

The NOKUT Conference on Higher Education 2015 takes place May 19th and 20th in the Grieg Hall, Bergen.

This year's programme reflects the major changes which are about to happen in the Norwegian educational system. Merging of universities and colleges are to secure a new and better structure, which in turn should contribute to increased quality in both research and education.

Registration deadline is 27. April.
Read more here (Norw.).

Horizon Lecture by Dr. Claussnitzer

Deciphering hidden functions in non-coding DNA - Horizon Lecture by Melina Claussnitzer April 16th.

Guest lecture on deciphering hidden functions in non-coding DNA to combat common diseases.

Dr. Claussnitzer currently works as an Instructor in Medicine and visiting Professor at MIT Computer Science and Artificial Intelligence Broad Institute of MIT and Harvard, Boston, USA. She works together with Prof. Manolis Kellis, who has a lead role in the RoadMap Epigenomics Project. The project recently received worldwide media coverage after a co-publication of several articles, including an article in Nature.

Refreshments will be served before the lecture, which starts at 16.15 pm in Egget, Studentsenteret, on Thursday 16th of April. Everybody is welcome!

PhD conference in Neuroscience

The Norwegian Research School in Neuroscience invites to their 3rd National PhD Conference in Neuroscience.

The conference will take place on 21-23 September 2015 at Panorama Hotel, located in a beautiful coast setting on the island Sotra outside Bergen.

Registration deadline is 28. May.

Read more here.

Seminar on stem cells

Bergen Stem Cell Consortium hosts their first seminar in Auditorium 2, BBB, University of Bergen, Tuesday 10th of March at 15-16.

Professor Helge Ræder: "The Stem Cell Node at the KG Jebsen Center for Diabetes Research" (10 min).

Postdoctoral fellow Simona Chera PhD: "Characterizing and reversing β-cell senescence and proliferation quiescence in monogenic diabetes" (35 + 15 min).

Refreshments will be served before the seminar, by the entrance of the auditorium from 14.30.

How to be a professor in Norway

NRC invites to a meeting in Litteraturhuset, Oslo, 27. April at 14.00-16.00.

The Research Council wants to clarify the process of getting a professor position, and open a discussion on what it actually takes to become a professor in Norway today.

Surprisingly few know the criteria of being promoted to professor, and the criteria and requirements vary from institution to institution, as well as between fields.

Especially women seem to be unsure about how they should go about to be a professor. Many experience that an academic career is something that is privatized and individualized. Will greater transparency help change gender imbalance at professor level in today's academia?

For complete list of K1-publications, see our website.

Level 2:

Level 1:

No smoking at entrances

There are new requirements in the Tobacco Act stating that it is forbidden to smoke in or near the entrances to government companies.

The university will therefore proceed by removing ashtrays and put up no smoking signs in all our entrances. The same goes for the hospitals.

Signs have been ordered and will be set up during March.

Office courses at Visma

UiB has a general supplier agreement with Visma for Office courses and graphic courses.

UiB gets 50% discount on Word, Excel, PowerPoint and Outlook courses, and 25% discount on Photoshop courses and the other Adobe programs.

See overview of the spring courses here.

This year’s IT-forum

The IT department invites to their annual IT-forum 29. and 30. April at Solstrand.

This conference is for anyone who is using and delivering IT services at UiB. Learn more about topics such as 3D printing, secure solution for data storage, supercomputing, Develops, safe handling of sensitive research data, Bioinformatics data analysis infrastructure, new LMS, Clusters and Media City Bergen, with more.

Read more here (Norw.).

Dispensation from paper based material safety data sheets

UiB has recently been granted dispensation from the Norwegian Labour Inspection to keep material safety data sheets electronically in EcoOnline, but there are terms. All employees need to be aware of these.

UiB uses the electronical material database EcoOnline. Here you can find all material safety data sheets for chemicals and biological factors updated at all times. It is not easy to keep a paper based file updated. Many UiB laboratories store large quantities of different chemicals. We were relieved when the Norwegian Labour Inspection finally granted UiB dispensation from keeping the records on paper.

But, all staff, students and guests who work with chemicals and biological factors need to have access to EcoOnline and know how to use it, otherwise the lab must have paper versions of the material safety data sheets available. This must be a part of the training of new personnel/students/guests. Read more here (Norw.).
