

# LIBKEY – FAST TRACK TO FULL TEXT

## What is LibKey?

With LibKey, you can immediately see which articles UiB has access to – whether you're on Wikipedia, PubMed, publisher websites, Amazon, or other places on the web. One click, and you're in the full text.

## LibKey.io

LibKey.io lets you copy-paste a DOI or PMID and go straight to the article. If the article is not available to UiB, you'll get alternative access options.

## LibKey Nomad

LibKey Nomad is a free browser extension that automatically checks if UiB has access to an article or e-book on the websites you visit. If we have access, you'll see a blue button with a green flame that takes you directly to the PDF or full text. If not, you'll get a link to Oria where you can request the article.

### Go to LibKey.io
