FORELESNING

[gratis inngang]

From Seafloor Hydrothermal Systems to the Sustainable Exploitation of Massive Sulfide Deposits: Myths and Realities of the Deep Sea

10.30 - 11.10 **Larry Cathles**
Cornell University, US

The importance of ocean resources in sustaining humanity
over the next millennia, and the importance of starting now

11.10 - 11.50 **Cindy Van Dover**
Duke University, US

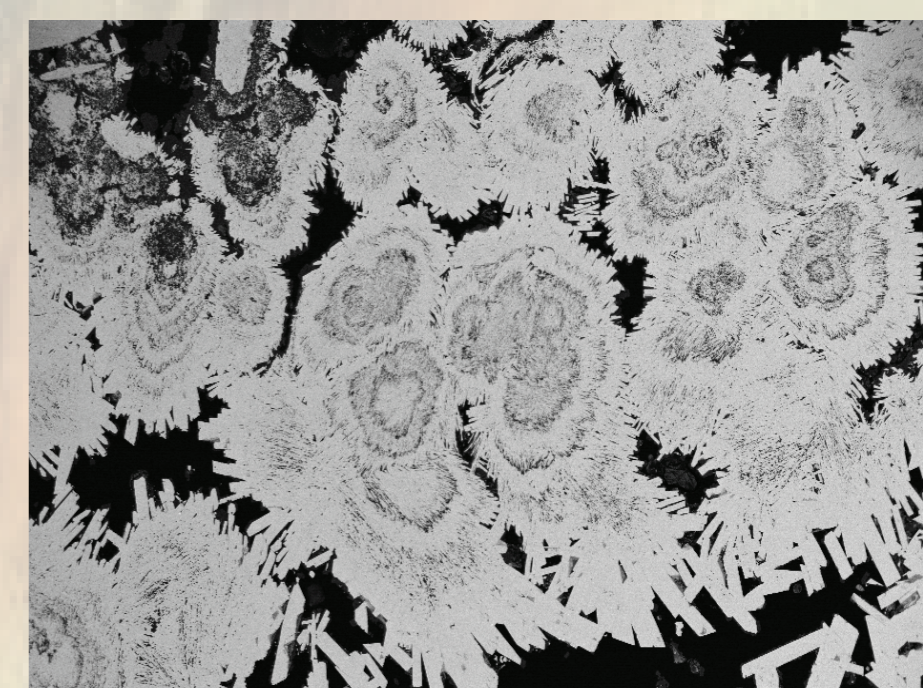

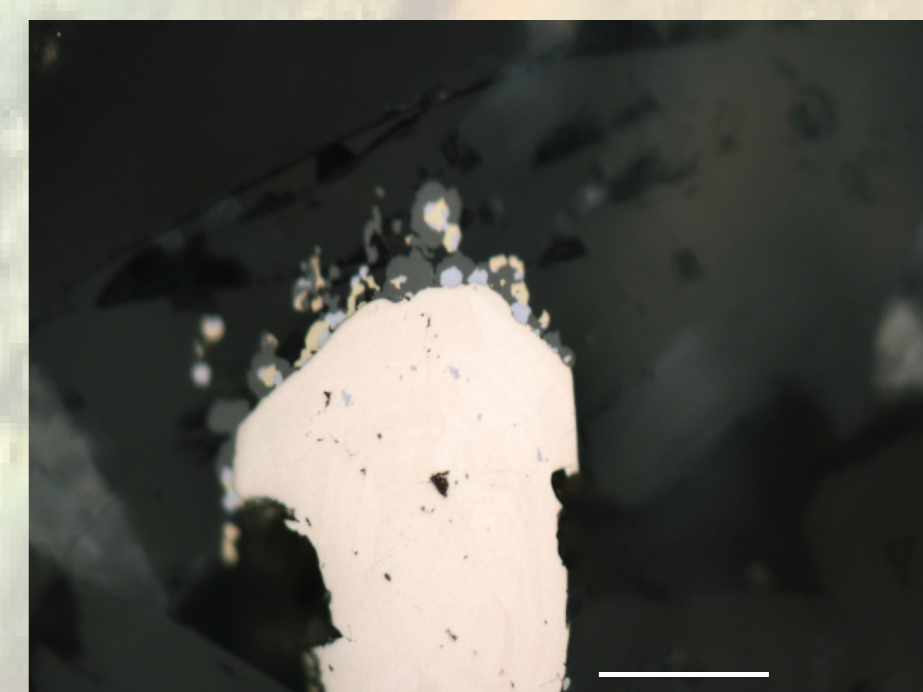

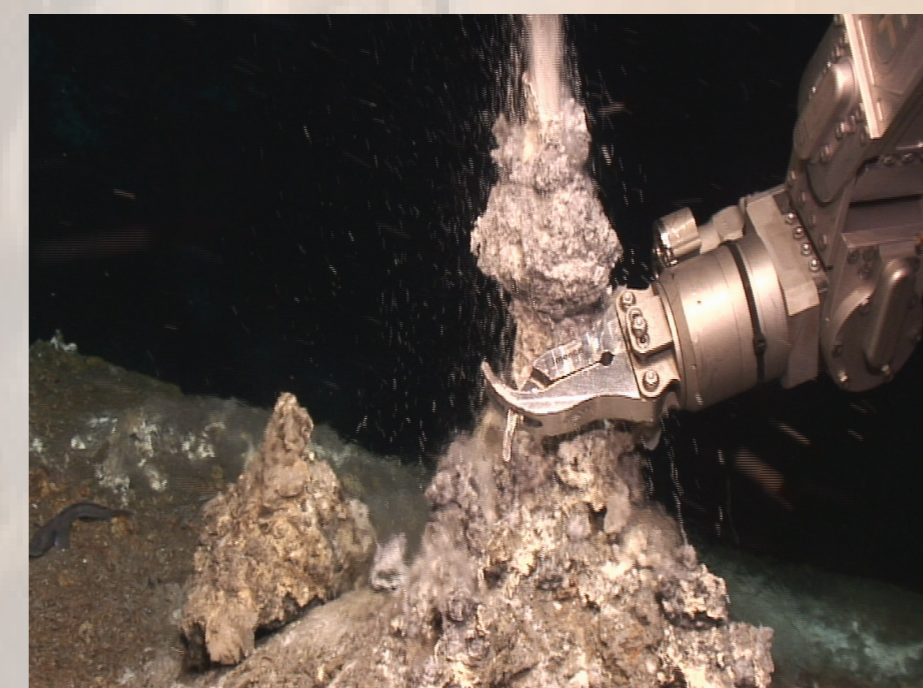

Digging for gold in the deep sea:
At what cost to the environment?

13.00 - 13.40 **Steve Scott**
University of Toronto, Canada

Seafloor massive sulfide discoveries and future mining

13.40 - 14.20 **Robert Embley**
NOAA - National Oceanic and Atmospheric Administration, US

The NOAA Earth-Ocean Interaction Program:
30+ Years of Global Hydrothermal Research

Centre for Geobiology

ff
Norwegian
Centre of
Excellence

Deep Seafloor • Deep Biosphere • Deep Time & Roots of life
