

ENGAGING CHINA

UiB Academic China Forum – Symposium 2022

Time: **Wednesday 11 May 2022**

Place: The University Aula in Bergen

Public debate on China and relations between Western democracies and the People's Republic have become more tense and polarized in recent years. China is ascending to become the world's leading economic power and its global political influence is on the rise. What challenges does this pose for academia?

Increasing tension in political and diplomatic relations between China and the West appear to have negatively affected academic cooperation on research and teaching, with adverse consequences for mobility and exchange of scholars and students. How do we manage to cope with deteriorating relations? How do we assess current Chinese political and social developments? And how can we improve our knowledge and insight on China to further build and develop competence?

The Academic China Forum of the University of Bergen invites to a discussion on the status and prospects of academic cooperation with Chinese institutions.

Public debate on China and relations between Western democracies and the People's Republic of China have become more divided and polarized, especially during the recent two years. Communications between China and the West have been further constrained by the COVID-19 pandemic, building steadily since early 2020. More tense political and diplomatic relations appear to have negatively affected academic cooperation on research and teaching, with adverse consequences for mobility and exchange of scholars and students. How do we manage to cope with deteriorating relations? Is academic cooperation threatened, and if so, what do we do about it? Is it important to maintain and develop academic cooperation? Why? How do we assess current Chinese political and social developments? And how can we improve our knowledge and insight on China and further build and develop competence?

China has almost 20 per cent of the world's population. China's position in world politics and the global economy has rapidly become far-reaching and of great importance. There is a general consensus among governments and scientists that international cooperation is necessary to solve global problems. Cooperation of some scope is obviously necessary for mutual development of knowledge and competence. But cooperation between academic institutions and scholars across democratic and authoritarian states is not unproblematic and not without risks, especially in the current global political atmosphere. How can scientific collaboration be developed to our mutual benefit in challenging political times?

The Academic China Forum of the University of Bergen invites to a discussion of the status and prospects of academic cooperation with Chinese institutions through four distinct thematic sessions at the symposium:

- *Mitigating Climate Change: On Academic Cooperation on Climate Change and Policies.*
- *Transreading Chinese Literature as World Literature*
- *Understanding China: Sociopolitical Changes in China and Implications for Academic Cooperation*
- *Knowing China: How to Build and Develop Competence on China?*

Introduction to symposium

Stein Kuhnle, Chair of Academic China Forum, University of Bergen

09:10–10:40

SESSION I: Mitigating Climate Change: On Academic Cooperation on Climate Change and Policies

MODERATOR: **Tore Furevik**, Professor of Physical Oceanography, University of Bergen, and Director of Nansen Environmental and Remote Sensing Centre

Description:

China is by far the largest emitter of climate gasses, but also the world's leader in renewable energy and electric transportation. It has the second largest and fastest rising scientific production and is expected to be number one in few years. What can Norway learn from collaboration with China on climate change and climate policies? And can they learn from us?

Panel participants:

Shengping He, Researcher, University of Bergen and the Bjerknes Centre

Gørild Merethe Hegelund, Research Professor, Fridtjof Nansen Institute

Julia Christine Marinaccio, Postdoctoral Fellow in China Studies, University of Bergen

10:40–11:00

Tea/Coffee break

11:00–12:30

SESSION II: Transreading Chinese Literature as World Literature

MODERATOR: **Huiwen (Helen) Zhang**, Associate Professor of Chinese Studies (Literature and Philosophy), University of Bergen

Description:

How has ancient Chinese literature inspired and influenced cultural developments in our modern multilingual societies? What motivated certain Western and Chinese writers to respond to each other's traditions and new trends in modern times?

Panel participants:

Peter C. Perdue, Professor of History, Yale University

Haun Saussy, Professor of East Asian Languages & Civilizations, University of Chicago

Bo Wang, Professor of Philosophy, Vice President of Peking University

12:30–13:30

Light lunch in the Aula

13:30–15:00

SESSION III: Understanding China: Current Political Development in China and Implications for Academic Cooperation

MODERATOR: **Hans Jørgen Gåsemyr**, Senior Researcher, Norwegian Institute of International Affairs (NUPI) and University of Bergen

Description:

The conditions for academic work in China are changing. The Chinese state is investing ambitiously in more and better research and education, creating greater incentives for some forms of research, but also introducing stricter regulations, delimiting the spaces for other activities. How do active, experienced and China-focused researchers assess and deal with the changing conditions?

Panel participants:

Anna Lisa Ahlers, Research Group Leader, Max Planck Institute for the History of Science (Berlin)

Stine Jessen Haakonsson, Associate Professor, Copenhagen Business School, and Sino-Danish Center

Chunrong Liu, Associate Professor of Political Science at Fudan University, Managing Director, Fudan-European Centre for China Studies at University of Oslo

Tommy Shih, Associate Professor, Lund University

Tim Summers, Assistant Professor, Chinese University of Hong Kong

15:00–16:00

**SESSION IV: Knowing China: How to Build and Develop
Competence on China?**

MODERATOR: **Martin Paulsen**, Head of Department of Foreign Languages,
University of Bergen

Description:

Without doubt China will be a crucial geopolitical actor in the 21st century. What kind of knowledge and skills does the Norwegian society need to meet this situation? How shall the required competences be developed, and who shall provide this capacity building? What should be the role of institutions of research and higher education in this process? How can different actors work together with the aim of strengthening research, teaching and academic cooperation?

Panel participants:

Camilla Brautaset, Dean of the Faculty of Humanities, University of Bergen, and
Professor of Modern Economic History

Mette Halskov Hansen, Vice-Rector for Climate & the Environment and Cross-Disciplinary,
University of Oslo, and Professor of China Studies

Ulf Sverdrup, Director of Norwegian Institute of International Affairs (NUPI)

16:00–16:05

End of Symposium
