A HISTORY OF WATER SERIES II

I.B.TAURIS

PUBLISHERS

Series Editor: Terje Tvedt, University of Bergen

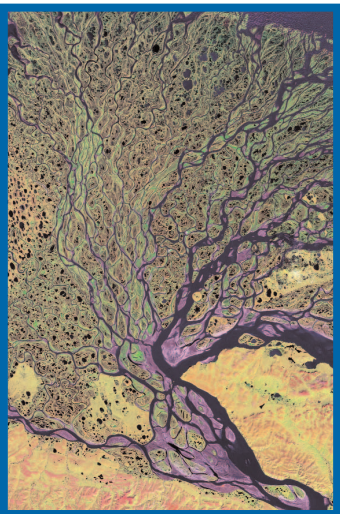

The pioneering History of Water series brings a much needed historical understanding to the relationship between water and society. The volumes in the series cover all aspects of water – social, cultural, political, religious, historical, economic and technological – from the earliest societies to the present day. Drawing upon the work of a diverse range of scholars, the Series provides a unique insight into the complex processes that have shaped the use and understanding of our most valuable resource.

Terje Tvedt is Professor of Geography at the University of Bergen and Professor of Political Science at the University of Oslo. He is the author of a number of successful books and videos on water issues, including *The River Nile in the Age of the British* (I.B.Tauris, 2004) and *The River Nile in the Post-Colonial Age* (I.B.Tauris 2009). He is series editor for the first History of Water series (3 volumes, I.B. Tauris, 2006).

A HISTORY OF WATER

VOLUME 1: IDEAS OF WATER FROM ANCIENT SOCIETIES TO THE MODERN WORLD

Edited by Terje Tvedt and Terje Ostigard

How has water been perceived in different societies and across different eras of world history? How have these changing conceptions informed and influenced our ideas about society and ourselves? In Ideas of Water leading international scholars explore the rich record of our ideas, from the beliefs of early societies to the latest scientific views on the nature of this unique substance. Ranging across all aspects – scientific, cultural and religious – this important work both challenges conventional interpretations and understandings of water in nature and represents one of the first attempts to provide a history of

our changing ideas of the role and significance of water in human society.

CONTENTS

1: A History of the Ideas of Water: Deconstructing Nature and Constructing Society

Part 1: From Big Bang to the Hydrological cycle

2: Water and Cosmos; 3: Water in Science and Scientific Discovery; 4: Water and the Development of the Concept of Chemical Substance; 5: Water, its flux, its cycle, and its power: the romantic turning point in the history of the water idea

Part 2: From Roman Aqueducts to Modern Spas

6: Aqueduct as Hegemonic Architecture; 7: Social Uses of Water in the Ancient Mediterranean; 8: The Rule of Water: Uncertainty and the Cultural Ecology of Water in South India; 9: Water and Sanitation from Antiquity to Today; 10: Cultural Ideas of Water and Swimming in Modern Europe

Part 3: From Judaism and Islam to the Maya water cosmology

11: Bathing in Divine Waters: Water and Purity in Judaism and Islam; 12: Purification, Purgation and Penalty: Christian Concepts of Water and Fire in Heaven and Hell; 13: Hydrolatry in early European religions and Christian syncretism; 14: Water in Aboriginal Australia; 15: "Rain, snakes and sex - making rain": Rock art and rain-making in Africa and America; 16: Shaping Beliefs, Identities and Institutions: the Role of Water Myths among Ethnic Groups in Yunnan of China; 17: Flood Myths; 18: Water Cosmology and Symbolism in the Mesoamerican and Peruvian Area in the pre-Hispanic period

October 2009 234 x 156mm 496 pages Hardback 978 1 84511 980 5 ~~£75.00~~ **£52.50**

A HISTORY OF WATER

VOLUME 2: RIVERS AND SOCIETY: FROM THE BIRTH OF AGRICULTURE TO MODERN TIMES

Edited by Terje Tvedt and Richard Coopey

Drawing upon the latest research findings, the authors suggest new explanations as to why some civilizations flourished whilst others failed. Ranging from explorations of classical agrarian civilisations – such as the Indus, Angkor and Maya – to analyses of the role of water in the modernisation process of countries like Spain, Britain and Japan, this important new work furthers our understanding of the ways in which the key relationship between humans and water has given rise to new forms

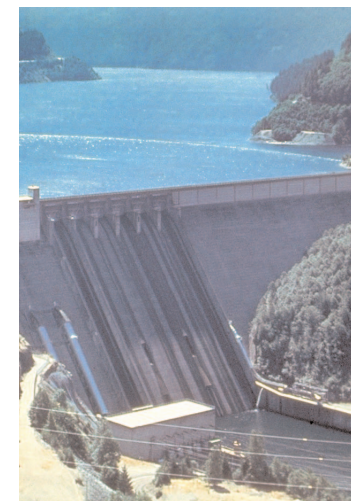

of social organisation, new technologies and economic activities.

June 2010 234 x 156mm 550 pages Hardback 978 1 84885 350 8 ~~£85.00~~ **£59.50**

VOLUME 3: WATER AND GEOPOLITICS IN THE NEW WORLD ORDER

Edited by Terje Tvedt, Graham Chapman and Roar Hagen

As the world's population continues to grow and an increasing number of countries aspire to a twenty-first century lifestyle, so the question of access to water resources becomes ever more critical. The contributors to this volume seek to provide a deeper theoretical analysis of the issues to provide a clearer understanding of how experience in one region can properly be related to or compared with that of other regions. The second section provides a wealth of historical examples, showing how current problems are not necessarily new, as frequently suggested. The final section is devoted to contemporary issues looking at the influence of water on geopolitics and geopolitics on water. Amongst the issues addressed are the Kurdish question; Indo-China relations; the development of the EU; and relationships between the USA and Canada.

September 2010 234 x 156mm 584 pages Hardback 978 1 84885 351 5 ~~£85.00~~ **£59.50**
