

## Research cruise 2009 – August 7 - Pictures

Hans Tore and Bernt study an unusual organism that cam up in the mochness.

Jon and Bernt are emptying the mochness. This one was deep in the plume.

The microbiologists are all hard at work: filtering, DNA testing ...

Ingeborg is testing the fluid samples taken from the vents for sulphides and ammonia.

Ingunn is looking at the samples of broken chimneys.
