

Hei, I am Josse, a PhD candidate in the Geodynamics and Basin Studies group. My work is focused on groundwater qualities worldwide. I am halfway into my PhD and have been at UiB for two years. I have conducted my bachelor's and master's in Amsterdam. I would like to serve on the board because I would like to contribute to the department.

I have experience being in the education committee during my master's, and I have served on the board for the Dutch Red Cross and several sports club in the Netherlands and Norway.
